

JP International School, Greater Noida
Session 2024-25

Date: 29/01/25

Circular No. JPIS/24/227

Dear Parents,

Namaskar!

Following the submission of project synopsis, we would like to inform you about the next phase of the Annual IDA/STEM Project Examination for **grades V to IX** :

1. Project Development Week:

- From **30th January to 4th February 2025**, students will have to work intensively with their team members to develop the complete working model of their assigned project.
- This week is crucial for teamwork and hands-on learning.

2. Project Synopsis Review:

- During this week, each team will be called in for a project synopsis review.
- The review will assess the project synopsis, and the contributions of each team member.

3. Component Procurement Support:

- If any team faces challenges in arranging or purchasing components for their project, they should reach out to Mr. Vishal Sir or Mr. Amar Sir as they will assist in connecting the team with shops that can provide cost-effective components.

4. Importance of Team Contribution:

- We strongly emphasize the importance of each team member's active contribution throughout the project development process.
- Individual contributions will be thoroughly assessed during the annual assessment.
- Projects that demonstrate collaborative effort and individual contributions from all team members typically achieve the best results.

We encourage active participation and effective teamwork during this crucial phase.

Please feel free to contact Mr. Vishal Sir or Mr. Amar Sir if you have any questions or require further clarification.

Thank you for your continued support.

Jai Hind

Ms. Ruby Chandel
(Principal)
